Die Steine wurden zueinander passend entwickelt, um belastbare Flächen derart zu gestalten, dass sie mit Grünbereichen unterbrochen werden oder gezielt ins Grüne auslaufen können. Die Abschnitte können vom Gestalter leicht auf die Nutzungsanforderungen zugeschnitten werden, ob geschlossen, halb offen oder offen. Je nach Belastungsart stehen zumeist Dicken in 8 oder 12 cm zur Verfügung. Die Steinreihen dieser Produktsysteme können passgenau miteinander kombiniert werden.
